

Succession Planning

Attendees will learn **what effective succession planning is** and why it is no longer an optional business practice. They will learn **when succession planning is needed** and, just as important, when it is not. Finally, they will learn **three proven succession planning methods**, developed by world class companies, that they can begin immediately applying to their own businesses.

The major learning objectives for the workshop include:

- *The business purpose of succession planning*
- *When succession planning is needed and when it is not*
- *How far down in the organization should succession planning go*
- *Three succession planning models that can be immediately used*
- *Tools for measuring succession planning effectiveness and ongoing development*
